LOGOS | FONTS | COLORS

| LOGOS & NAME |

MERS Missouri Goodwill Industries

Color: The preferred logo is the version using full color. No other colors outside of those identified in this guide. Alternatives:

White One Color | Blue One Color | Black One Color

Sizing: The proportion should remain intact. The logo should be no smaller than .25" wide for print.

Name: Name should include both MERS and Missouri without any slashes.

| FONTS |

Utilization of fonts in printed materials will vary from e-learning content. In printed materials, large fonts can look amateurish, and small fonts can be difficult to read. Try and find a balance while not varying types of font too much.

HEADER	CENTURY GOTHIC | Bold | Font Size between 16 and 28 pts
SUBHEADER	GILL SANS MT | Regular or Bold | Font Size between 14 and 18 pts
BODY	ROBOTO | Regular or Light | Font Size between 10 and 14 pts
ACCENT	MINION VARIABLE CONCEPT | Regular, Medium, Semibold, or Bold
ACCENT	URW ANTIQUA | Regular, Medium, Bold, or Super Bold
ACCENT	ROBOTO SLAB | Thin, Light, Regular, or Bold

| COLORS |

Generally, all visual content should be composed using the primary color palette. Secondary colors should be used to allow for flexibility. White and black are assumed appropriate colors as well. All colors can be tinted on a 20% scale.

PRIMARY COLOR PALETTE

VYOND | VIDEOS

| FONTS & TEXT |

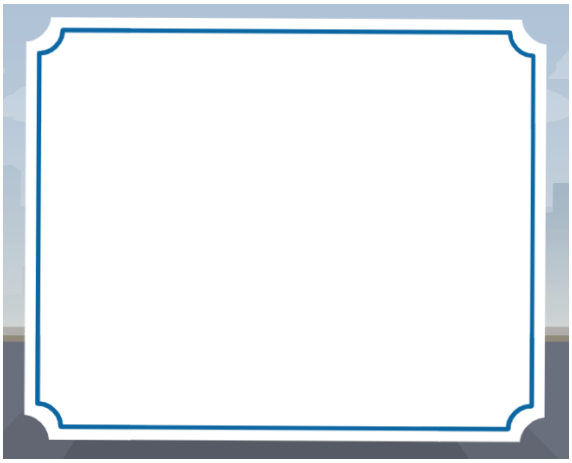
Fonts: Headings in Vyond should be in Century Gothic with a size between 24 and 30 pts. All other text should be in Roboto with a between 16 and 18 pts.

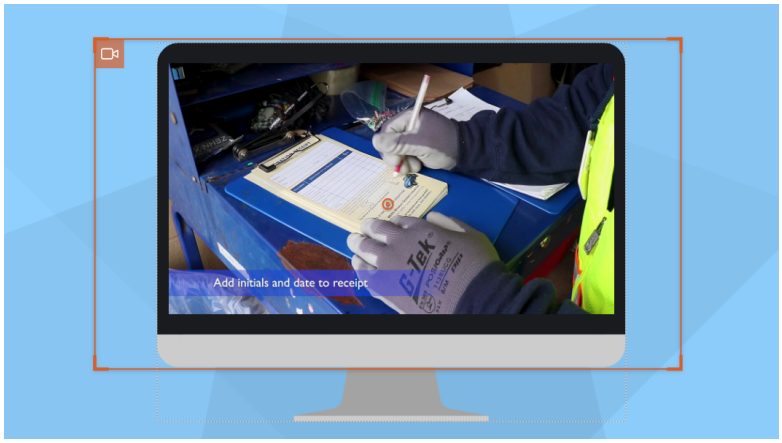
Text: When using bullet points in Vyond, use a dash or an em dash. Do not use circles.

| HEADERS & TEXT BOXES |

Headers: Use either the circular or rectangular header pictured below in Vyond. Use a blue background unless it makes sense to change the color for your video.

Text Boxes: Use the text box pictured below when displaying text in Vyond. Feel free to adjust the sizing of the text box as much as you want. Just keep the proportions and width of the text box and header equal.





| MISCELLANEOUS VISUALS |

Screen visuals: Any time you show footage or animations within a computer screen in Vyond, the camera zoom should look like that pictured above. The position should be approximately 317 on the X-axis and 164.98 on the Y-axis. The size is about 482.82 wide and 271.59 high.

Shared elements: If you create a scene or character in Vyond you think could be useful, add them to the shared folder so others on the team can use them as a resource.

Finger animations: For process videos that use screen recordings or screen shots, use the finger animations on Vyond to add movement and clarity.

| MUSIC |

For onboarding videos, use one of the approved songs in the music folder in the general Teams channel. For other videos, pick any free song you would like.
